

Statistical Report

To create a statistical report:

1. In the report manager tab select your survey and click on the statistical button
2. Select which type of statistical report you want to create- comparison or multi level
3. Choose which questions you want to use for your conditions or in your multi level report
4. Click generate report

This report allows for the analysis of open-ended, numeric questions, and displays the statistics derived from these survey responses. The survey creator can compare 2-5 data sets in a statistical format using the comparison report. They can also generate simple reports with statistics using the multi level.

This is a conditional statistical report

Remember: The system will only display those survey questions whose answers are of a numeric type as this is a statistical report.

Report Legend- displays conditions set

Report Legend

Report 1 [8 Responses]		
Q1. Have you ever traveled with Travel Inc. before?	is	Yes
Report 2 [3 Responses]		
Q1. Have you ever traveled with Travel Inc. before?	is	No

Q2. On a scale of 1 through 5 please rate your probability to travel with us...

Sum	Mean	Median	Mode	Min.	Max.
28.00	4.00	4.00	4.00	3.00	5.00

Sum	Mean	Median	Mode	Min.	Max.
0	0	0	N/A	0	0

Statistical data for each question

If you selected a multi level report :
